

Dimming Instructions – TLE-110S MM

Streamlight SL20X®

With (TLE-110S MM) installed, your Streamlight SL20X® Flashlight now has 3 Light Levels

To dim flashlight using “full click” method:

Flashlight will first come on in “Full Brightness” mode.

“Half Bright” and “Moonlight” brightness levels can be accessed by fully depressing the switch using short intervals between clicks.

To dim using “soft click” method:

Flashlight will first come on in “Full Brightness” mode.

Toggle through light levels by “soft pressing” the flashlight switch until you reach the desired brightness (short intervals between clicks).

To maintain the desired brightness, fully depress the switch.
